

This is an audio CD, where John Satterfield was interviewed for Area Auto Racing News. Great to lesson to for some history of John and dambest.

This CD explains the differences there were between leaded fuels pre-1970, and today's unleaded. So one can convert carb and engine from then to now

The Installation CD is a collection of suggestions from start up to driving. When ever there is a change in engines or driving styles, we work out the change so you will transition more smoothly.

The Spark Plug CD is an audio presentation so you can lesson while you travel. It explains how to read earlier colored plugs, and today's plugs without color. Our dambest carbs have droplets so efficient the plug is left with no color.

Project Engineering is a DVD you watch and it explains how develop a complete engine project and all the subcomponents.

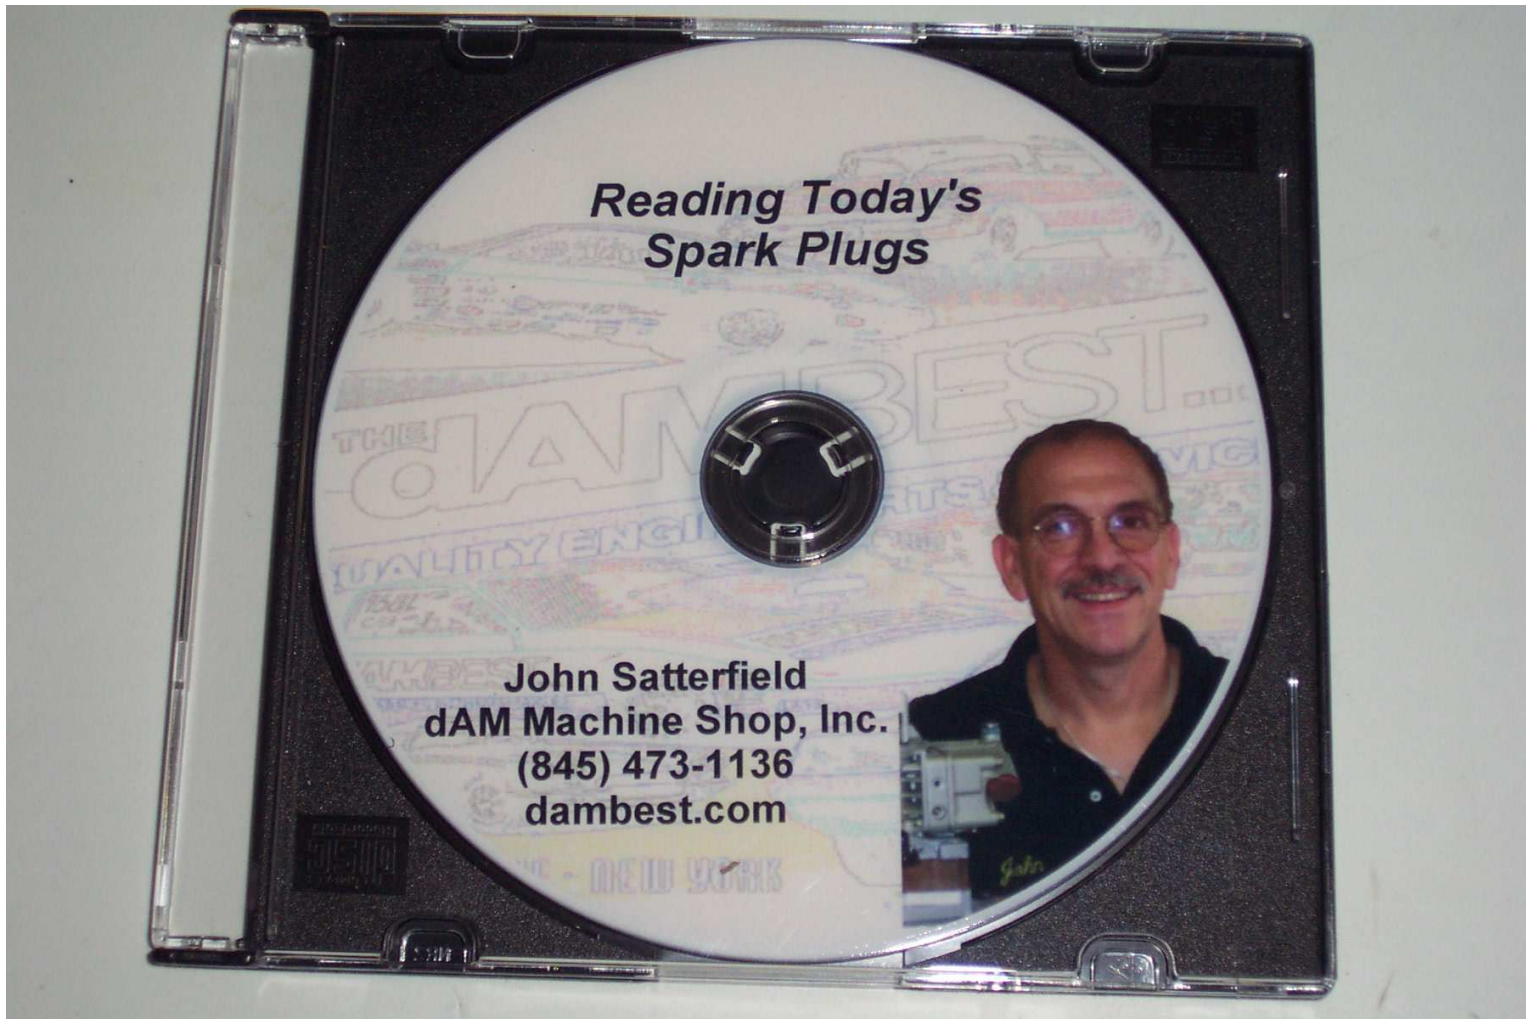

This DVD comes with a copy of the slides to be printed out, so you can more easily follow this complicated course on engine dynamics.

This is a non-audio CD, full of carb brochures and all other great things about dambest and John

It is here! Many people asked for a DVD on our Spark Plug CD. This has the original audio with all new illustrations , and with

2008 Carb-Engine Class 7CD collection audio only \$99.00... This is all of the conversation to and from the carb class,,, GREAT STUFF!!! About 6 Hr's .
