

News for 01/30/07

Hi,

We are thrilled to announce the first of the 4500 Series brochures - for the 1.750" butterfly.

John

dAM 4500 Series Carb **"The switch is on"**

The *dAMBEST* billet carb is the most powerful and responsive carb of its size. Every angle of throttle position is adjustable, and adjustable linkage allows control of the rate at which the secondary is applied.

Its light weight, patent pending billet housing has 200% more booster signal which, in conjunction with *dAM*'s patented emulsion system, gives about 100 times the emulsification of modified other brands.

With 947 CFM at 10" of water and 1329 CFM at 20", the 1.750 carb out-flows all other 4500 series carbs of the same size, yet has superior booster signal: 86" of water at 20" test pressure. It is recommended for engines of 650 to 1000 HP.

dAM has five US patents in fuel emulsion technology incorporated into the metering blocks to reduce droplets to previously unattainable size. Standard hardware makes tuning easy and affordable.

This brand new multi-fuel throttle-body-replacement carburetor has application in towing, motor homes, and boats. It can use Gasoline, E-85, and Methanol.

Features include:

- **New light weight: a mere 8-1/2 lbs.**
- **Bottom feed needle & seats to reduce fuel foaming**
- **Improved fuel view window**

Many more sizes available: 1.875, 2.000, 2.125, 2.250.

*Every dAM carb is serial numbered with it's own build sheet, and wet flow sheet.
