The Ultimate 4150 Carburetor

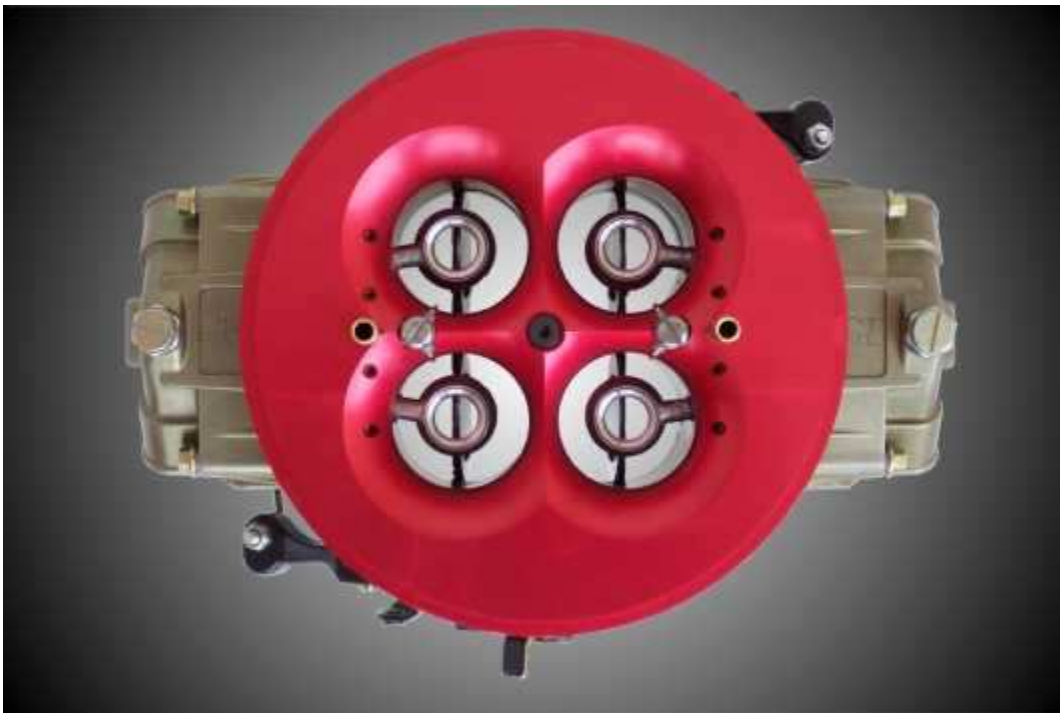

Hi Again,

The Ultimate 4150 has arrived! Last September we announced that we had started development of the Ultimate 4150 style carb. Here it is fully anodized and ready to ship. We believe it will be the largest, highest flowing in production. Flow bench figures aren't in yet, but with 2" throttle bores over a 4150 base and a 4500 air cleaner surface on top, we expect in the neighborhood of 1450 CFM at 20" of water. That's based on the 1698 CFM performance of our 2" bore 4500 series. This light weight, fully profiled beauty is intended for applications producing in excess of 900 HP while being restricted to the 4150 style carb. See our [4500 series brochure](#) for the full list of features.

For those who have always wanted to have a dAMBEST, personally signed, trophy carb for display in the home or office, we will offer a series of serial numbered and signed trophy carbs. These are actual working carbs, signed and mounted for display.

John
