Sneak Peek at the E-Jet

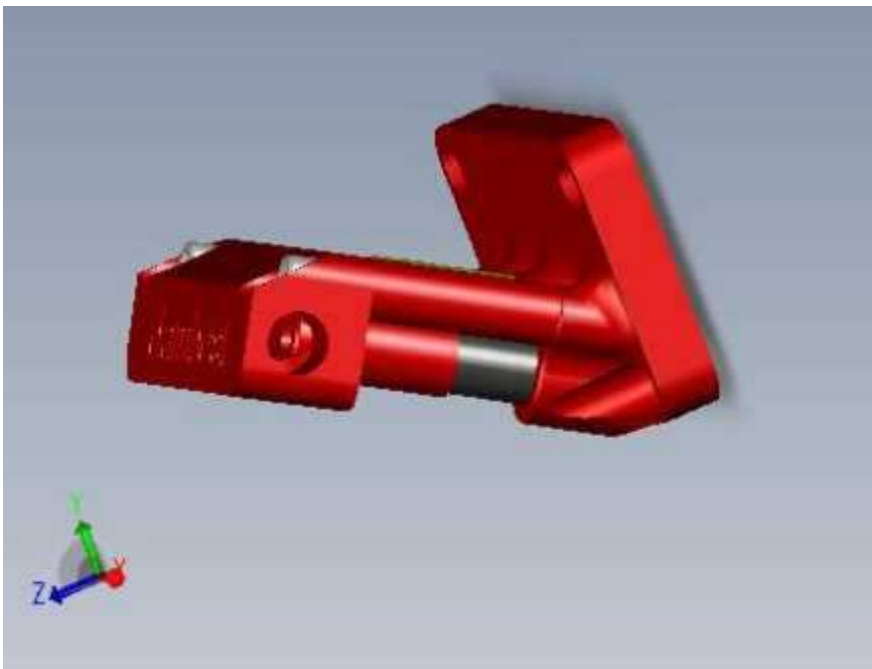

dAMBEST does it again and continues to lead the way in innovation!

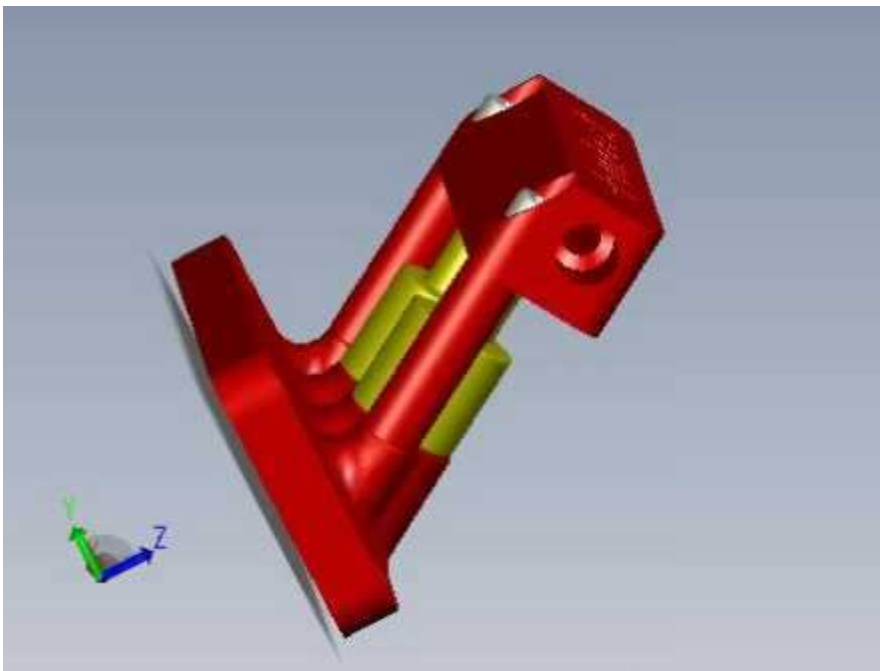

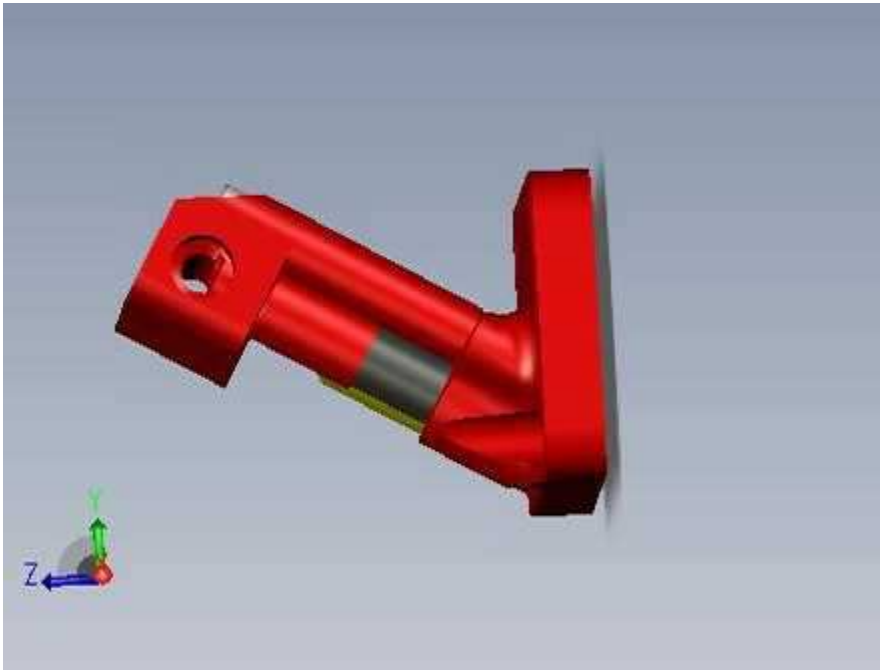

The patent pending dAM E-Jet replaces both the float bowl and the main jet. It is controlled by the ECU and can be programmed for multi-fuel mapping. Without a float and needle fuel delivery is unaffected by acceleration forces. You could drive your car upside down!

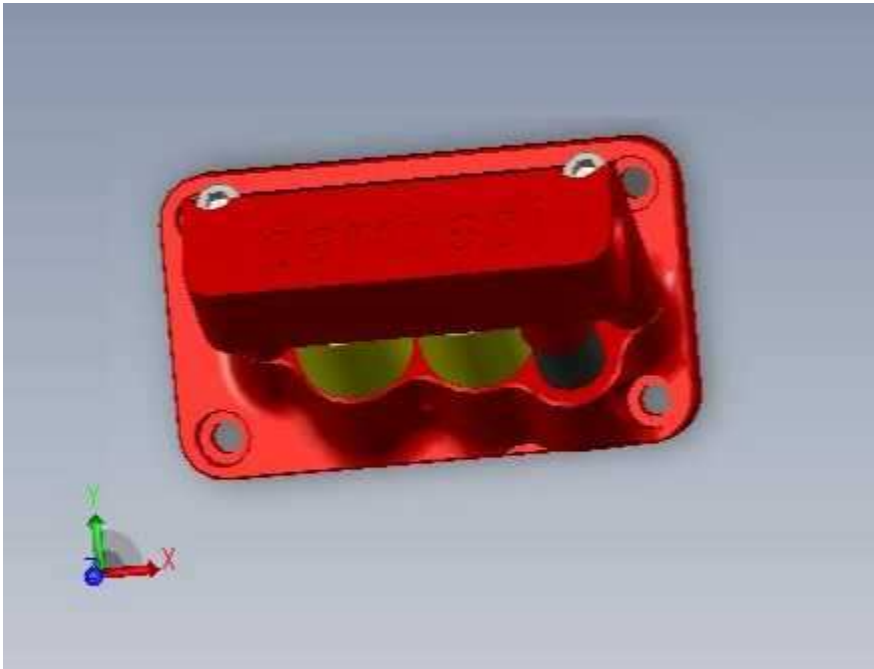

Here's a sneak peek at the CAD drawings. Stay tuned for photos of a prototype.

John
